

Performance

• Performance tools for production Zenet:

Layer	Tool	Purpose
Backend profiling	<u>py-spy</u> + <u>cProfile</u>	Find slow functions
Load testing	k6 or locust	Test API under stress
Database queries	<u>pgBadger</u> + <u>Supabase</u> metrics	Identify slow SQL
Frontend perf	Lighthouse + Web Vitals	Page load, Core Web Vitals
Production monitoring	New Relic or Datadog	Real-time APM (defer for now)
Tracing	<u>Langfuse</u> (already planned)	Agent/Claude API latency
