

CI - CD Checklist example

GitHub Setup

- Repository configured (public or private)
- Branch protection on main (require PR reviews)
- GitHub Secrets added (API keys, tokens)
- Status checks required (tests must pass)

Testing

- Backend: pytest running in CI
- Frontend: vitest + E2E tests
- Coverage reports generated
- Minimum coverage threshold (80%+)

Linting & Quality

- Backend: ruff + mypy
- Frontend: ESLint + TypeScript checks
- Security scanning: TruffleHog (secrets)
- Dependency audits: pip audit, npm audit

Deployment

- Backend: Deploy to Railway on main push
- Frontend: Deploy to Vercel on main push
- Health checks after deploy
- Rollback process documented

Monitoring

- Sentry configured (error tracking)
- Langfuse configured (AI monitoring)
- Slack notifications on deploy/failure
- UptimeRobot pings production endpoints

Documentation

- DEPLOYMENT.md in repo
- Secrets list documented (for team)
- Rollback procedure documented
- Emergency contacts listed

Example: Full Deployment Log

✅ Backend CI/CD Complete

1. Code pushed to main
2. GitHub Actions triggered
3. 🔍 Security scan: No secrets found ✓

4. 🧪 Tests: 156 passed, 0 failed ✓
5. 📄 Lint: No issues ✓
6. 🏗️ Build: Docker image created ✓
7. 🚀 Deploy to Railway: Success ✓
8. 💖 Health check: API responding ✓
9. 📊 Sentry: Connected ✓
10. 💬 Slack: "@team Backend deployed (commit abc123)"

Frontend CI/CD Complete

1. Code pushed to main
2. GitHub Actions triggered
3. 🧪 Unit tests: 48 passed ✓
4. 🌐 E2E tests: 12 passed ✓
5. 🏗️ Build: Next.js optimized ✓
6. 🚀 Deploy to Vercel: Success ✓
7. 📊 Lighthouse: 95/100 ✓
8. 💬 Slack: "@team Frontend deployed (commit abc123)"

🎉 All systems deployed. Production live.
